(a)
ê
|R · ê|
X_c
(b)
Z(s) = r(s) · ê
Running maximum and minimum
Records: span grows
Projected position Z/p
Contour position s/p
X_c
s*
(c)
[Z(s* − σ) − Z(s*)]/p
slope v
record plane
Length read backward from s*, σ/p
(d)
beyond the record
⟨Ψ⟩_u
y/p + z_M
z_M
Distance from the record, y/p
